Subject: RE: [EXTERNAL] Flock | Device Tampering

Michael,

I went a looked at this device. It appears that it may been struck by a tractor trailer, or similar vehicle. The solar panel is broken and it looks like the whole pole had been spun around. I looked at the images and it looks like it has been that way for longer than the last 30 days.

Good morning,

I wanted to reach out regarding the LPR located at [redacted]. It appears the device has been tampered with, as the camera has been twisted out of alignment.

Could we have someone check on the unit? Someone might be able to temporarily reposition it back facing the road until a technician can get on site to properly secure it.

Please let me know your thoughts.

Thank you,

Michael Pearman
