Deputy Chief Adams,

Please apologize for the delayed response as I was out of the office. I hope you were able to find a solution before the holiday.

Regarding your request, for next time, there are two primary options for managing fireworks alerts:

1. Disable the Audio network for specific roles: This can be done at a departmental level, but please note that it will disable all audio alerts for those users.
2. Individual settings: Users can manually turn off the alerts within their own individual settings.

I apologize again for the delay in getting back to you.

Michael Pearman
Technical Account Manager
