Chief,

Here are the locations we mapped out today. Additionally, here are the infrastructure requirements for Alpha:

Electrical:

- Single phase. 208/240V, 30A, 60Hz

Connectivity:

- RJ45 Ports: Hardwired internet connection.

Placement:

- The dock requires a 15x15 space on asphalt or concrete. Additionally, we need a subsequent area close by for a failover landing spot. It does not need to be right beside the dock. We are looking for a space up to 20x20 for emergency landings.

Security:

- Locating the dock in a fenced or secure area is recommended.

Happy to map other spots you'd like to look at!
