DC Adams,

I am writing to share a quick update regarding our plans for the mobile app. While we initially intended to test the outcomes feature with a small group, I am excited to announce that we have now deployed this feature to the entire organization.

This update addresses a significant pain point for patrol users, who previously had to return to a desktop or forgo logging outcomes entirely. You can find a short video demonstrating the feature here: Creating Outcomes in Flock Safety Mobile App

I encourage all users to reach out to me directly with any questions or feedback as they begin using the feature. **Please feel free to forward this video to all users!**

If users do not immediately see the feature please log out and log back into the app.

Thank you,

Michael Pearman
Technical Account Manager
