Brian,

Thank you for that update and I completely understand and appreciate your commitment to improving your service. If there are any future opportunities to test the outbound integration using our CAD please let us know.

Thanks LaTonia.

Re: Flock outbound video integration, it's something that is being developed but not heavily prioritized over improving video quality/performance/features natively. No current guidance on when that would be generally available, and which platforms that would integrate with. It's not something I'd currently plan on in the near future.

Alan, please let us know if we can help in any way possible with questions that are with Watson.

Thanks!
Brian
