Subject: [EXTERNAL] Flock Safety + Axon gap — Johnson City PD investigation workflow

****CAUTION: External Email**** This email originated from outside of Johnson City's e-mail servers. DO NOT click links or open attachments unless you recognize the sender and know the content is safe.

Hi Deputy Chief Adams,

My name is Asif from VIDIZMO — V-I-D-I-Z-M-O. I have been in conversation with several people across Johnson City PD — Megan Bell in legal, your records team, and Sgt. Todd Moody in Records — and I wanted to reach you directly about something separate from the redaction conversation.

This is specifically about the investigation side.

You personally championed the Flock Safety camera program at Johnson City PD. Publicly you have said you cannot speak highly enough of how Flock cameras help your investigators. That tells me you understand the operational value of intelligence tools better than most command staff I speak with.

Here is the specific gap I want to make sure you have visibility on.

Flock Safety generates plate reads and clips continuously. Your investigators use that data on active cases. But that Flock data does not connect automatically to your Axon evidence system. When a Flock hit becomes relevant to a case — a plate read, a clip — someone is pulling it manually from Flock and handling it separately from the Axon ecosystem. There is no unified chain of custody connecting the two.

VIDIZMO Intelligence Hub closes that gap. It brings Flock Safety data, Axon BWC footage, and any other evidence source into one searchable platform. Investigators search across all of it simultaneously — by face, vehicle, or object in seconds. Cross-references automatically against witness statements and case files. Builds a complete investigation timeline. Works across video, audio, and documents at the same time.

For a department running 175 officers with both Axon and Flock generating evidence continuously — this is the intelligence layer that connects everything your investigators already have.

The pricing starts from just $127 per user per month (vidizmo.ai/intelligence-hub-pricing-plan) and on Annual basis you save 17% on the total cost. We also offer a 7-day free trial on your live environment — no card required.

Would any time this week or next work for a 20-minute call?

Best Regards,
Asif Mustafa
