# Description of Camera Issue
- Description: [On 09/07/2026 at 00:00 hours, Officer F. Delgado (962) responded to a Vandalism/Misdemeanor at [redacted] While on routine patrol, I observed a Flock Gunshot Detector seemingly pushed over. As I got closer to the device, it appeared that someone attempted to push the device over in an attempt to disable it. However, they only shifted it within the ground it was placed in, leaving it at a 45-degree angle, still in the ground. No damage was seen on the pole. The device itself at the top appeared untouched. The device will need to be dug out and placed in the ground again, but no damage to the device itself was seen. There was no one in the area when I noticed this, and there is no way to know the exact time this may have occurred.]

# Date Concern (When issue was first noticed?)
- [09/07/2026]

# Is the location damaged?
- [Yes/No] - YES
