Hey Team,

Wanted to bubble up a last minute grant that may help you.
https://www.transportation.gov/grants/SS4A

"The US DOT has the last year of Safe Streets and Roads for All (SS4A) grant applications due May 26th. It has 1 BILLION dollars for Cities and Counties to improve roadway safety and covers 80% of the cost with a 20% local match. Their priorities match really well with Traffic Analytics, Crash Detection, Solar Video and even DFR for traffic incident management:

- Promote safety to prevent fatal and serious injuries on public roadways (example of latest success out of Chamblee using video to reduce incidents)
- Employ low-cost, high-impact strategies that can improve safety over a wide geographic area (i.e. traffic and speed analytics across network)
- Incorporate evidence-based projects and strategies and adopt innovative technologies and strategies (i.e. continuous speed data from more LPR cameras
- Demonstrate engagement with a variety of public and private stakeholders (i.e. pulling data from public safety)
- Modernize public safety infrastructure, including prehospital blood transfusion capabilities and improve post-crash care (i.e. DFR to get to traffic incidents faster)"
