Subject: Request to move LPR P#128 and Private property remapping

Good morning, I have one LPR that a lady keeps complaining about to city commission and city management and they have asked me to move it. I have a new location in mind. I also have several Private Property permissions that were denied so they need to be remapped as well.

Sorry for the additional work. We have begged some of these to allow us to install but it is what it is.
